REPORTING PERIOD: Calendar year 1999

Implementation of market access opportunities: tariff and other quota commitments

A. General remarks concerning the third column

(b) Allocation to importers: in the absence of remarks concerning subparagraphs (ii), (iii) and (iv), the following provisions apply:

- (ii) A general import licence (PGI) is required for imports under a tariff quota (TQ). This licence is granted automatically and is for statistical purposes. Persons liable to customs controls must show the number of their licence on the customs declaration. The licence is not transferable and is generally not limited in time. Shares of TQ are only granted to individuals, businesses and organizations (irrespective of nationality) that: (a) are established on Swiss customs territory; (b) import goods in the sector concerned for business purposes; and (c) provide guarantees that, where necessary, they can meet the requirements and undertake the commitments related to utilization of shares of TQ.
- (iii) If import at the TQ rate is authorized provided that the importer purchases a fixed proportion of domestic products, an importer meeting this requirement may import at the TQ rate even if the TQ has been exhausted.
- (iv) Shares of TQ are usually granted for a limited period.
