Group on Basic Telecommunications

Note by the Chairman

It has been suggested by a number of delegations that it might be helpful to produce a brief and simple note on assumptions applicable to the scheduling of commitments in basic telecoms. The purpose of the attached note is to assist delegations in ensuring the transparency of their commitments and to promote a better understanding of the meaning of commitments. This note is not intended to have or acquire any binding legal status.

NOTES FOR SCHEDULING BASIC TELECOM SERVICES COMMITMENTS

1. Unless otherwise noted in the sector column, any basic telecom service listed in the sector column:
 - (a) encompasses local, long distance and international services for public and non-public use;
 - (b) may be provided on a facilities-basis or by resale; and
 - (c) may be provided through any means of technology (e.g., cable¹, wireless, satellites).
2. Subsector (g) --private leased circuit services -- involves the ability of service suppliers to the sell or lease any type of network capacity unless otherwise noted in the sector column. This would include capacity via cable, satellite and wireless network.
3. In view of points 1 and 2 above, it should not be necessary to list cellular or mobile services as a separate subsector. However, a number of Members have done so, and a number of offers have commitments only in these subsectors. Therefore, in order to avoid extensive changes in schedules, it would seem appropriate for Members to maintain separate entries for these subsectors.

¹Including, for example, copper, fibre optic and cable television cable.
