

CHAPTER 85

[Chapter Notes][Chapter Rules][Legal Notes]:

For the purposes of this chapter:

[1. Limitations on change of classification rules: (US)]

[[Notwithstanding the product specific rules in the matrix,] where a change of classification (i.e., change of heading, subheading, split heading or split subheading) results from one of the following circumstances, origin shall be determined as indicated: (US)]

[Where satisfaction of the rules of this Appendix results solely from the following circumstances, origin shall be determined as indicated [herein] [in Appendix]. (Alternative US Text)]

A. Disassembly

Disassembly operations, including those which result in a change of tariff classification, shall not be considered origin conferring. (Basket 1)

- [(1) A change of classification which results from the disassembly of the good that can perform its original purpose shall not be considered as the change required by the rule set forth in the matrix. The parts recovered from the good shall retain the country of origin of the good prior to disassembly. (US) **(Issues Nos.11 and 12)**
- [(2) A change of classification which results from the disassembly of the good that cannot perform its original purpose without being restored or repaired shall not be considered as the change required by the rule set forth in the matrix. The country of origin of the recovered parts shall be (one among the following options (US):] **(Issues Nos.11 and 12)**
 - [(a) the country where the parts are recovered;] (SEN)
 - [(b) the country of origin of the good from which the parts are recovered;] (CAN)
 - [(c) the initial country of origin of the parts.] (IND)

[Reassembly of disassembled parts: **(Issue No.13)**

A good reassembled from disassembled parts shall have origin in the country where the good satisfy the rule set forth in the matrix. If the country of origin is not determined by the rule set forth in the matrix, [Note][Rule] *[a [general] [final] residual rule]* 2 shall apply. (CH)]

B. Packaging or repackaging (Issue No.6)

[Where a change in classification results from packaging or repackaging the origin of the good shall be the origin prior to such packaging or repackaging. (US) (AUS) (SEN)]

C. Application of HS GIR 2(a) - Collection of parts into kits (Issues Nos.4 and 5)

[Where a change in classification results from the application of HS General Interpretative Rule 2(a) with respect to collections of parts that are presented as unassembled articles of another heading or subheading the individual parts shall retain their origin prior to such collection. (For goods assembled from collections of parts, Note 2.C shall apply.) (US) (AUS)]

[A change of classification which results from the application of Rule 2(a) of the General Rules for the Interpretation of the HS (GIR 2(a)), with respect to a collection of parts, shall not be considered as the change required by the rule set forth in the matrix. (Sec)]

[A good assembled from a collection of parts that are classified by virtue of the application of GIR 2(a) in the same heading or subheading as the good shall have origin in the country where, subject to paragraph *[next]*, the relevant rule or note set out in the Appendix is satisfied.

The change of classification that may be required by the relevant rule in the matrices is considered to have taken place in the country in which the good is assembled from the collection of parts.] (JPN) (CAN) (HK) (CH)

D. Functional units (Issue No.7)

[Where a change in classification results from the application of note 4 to Section XVI of the HS to separately packaged goods presented together in a single shipment the separately packaged goods shall retain their origin prior to such presentation. (US) (JPN) (AUS)]

E. Change of use (Issue No.9)

[A change of classification which results from the change of use of the good shall not be considered as the change required by the rule set forth in the matrix. (SEN)]

F. Recertification or retesting of articles (Issue No.10)

[A change of classification which results from the recertification or retesting of the good shall not be considered as the change required by the rule set forth in the matrix. (Sec)]

G. Degradation of goods by ageing or consumption or any other reason **(Issue No.8)**

[[Unless otherwise provided] a change of classification which results from degradation of the good by ageing or consumption or any other reason shall not be considered as the change required by the rule set forth in the matrix. (SEN)]

[Origin Conferring Primary Rules (Sec)]: (SG) (IND) **(Issue No.1)**

[A. Goods of this chapter that are not wholly the product of one country shall be deemed to originate in the last country where one of the following occurs:

- (a) Non-originating materials undergo a change of classification from any other sub-heading, including a sub-heading of the same heading (CTSH); or from any other heading (CTH) as indicated in the specific headings or subheadings; or
- (b) Obtaining goods from parts by assembly, including sub-assembly, shall be considered as reflecting last substantial transformation; or
- (c) Process (such as mounting of integrated circuits) as defined for the specific headings or subheadings which result in new characteristics or use in the finished product. (SG)]

[B. An assembly operation resulting in a new good having new characteristics is considered to be substantial transformation. (IND) (MOR) (SEN for Chapters 84 to 86 only)]

[C. For the purposes of Chapter 87 the following goods, when assembled and finished, shall originate in the country where assembly and finishing results in a change of subheading:

- (a) Bumpers;
- (b) Air bag systems (including inflators and modules);
- (c) Body assemblies ;
- (d) Brakes and servo-brakes;
- (e) Gear boxes and similar gear assemblies;

- (f) Axles, whether or not provided with other transmission components;
- (g) Wheels;
- (h) Suspension shock-absorbers;
- (ij) Vehicle suspension assemblies;
- (k) Radiators;
- (l) Silencers and exhaust pipes;
- (m) Clutches;
- (n) Steering wheels, steering columns and steering boxes;
- (o) Handle bar assemblies; and
- (p) Chassis or frame assemblies. (US)]

2-2. [Additional and residual (US)] [Origin Conferring Primary (Sec)] rules:

[When neither the product specific rules provided in the matrix nor legal note 1 above are determinant of origin, the following shall apply: (US)]

[A. Goods produced from forged or cast blanks (US) (CH) (AUS) (**Issue No.2**)

Where goods are produced from forged or cast blanks which had the essential character of the complete or finished goods and were classifiable, by application of HS General Interpretative Rule 2(a), in the same heading or subheading as the complete or finished goods:

- (1) Provided the following criteria are met, the country of origin of the goods shall be the country in which the blank was finished: (US) (CH) (AUS)
 - (a) In its imported prefinished condition, the blank was not capable of functioning for its ultimate use and was not advanced beyond cleaning or working to remove flash, sprues, burrs or similar excess material, [and (US)] (AUS)

- (b) In the country in which the goods were finished: (US) (CH)
 - (i) The blank was configured to final shape by the removal of material (other than merely by honing or polishing or both), or by bending, hammering, pressing, stamping or similar forming process; and (US) (CH)
 - (ii) The blank underwent one or more of the following processes:
 - 1. [Hardening to a minimum hardness of 38 degrees Rockwell C [or Vickers H-V-3-70] or equivalent standard of hardness; (US)] [Heat treatment or thermochemical treatment, such as glowing, tempering, hardening; (CH)] or
 - 2. Assembly with five or more parts (other than parts of general use as defined in [Note 2 to Section XV or similar parts of plastic (Chapter 39) (US)] [Note 1(g) to Section XVI of the HS (CH)]); or (US) (CH)
 - 3. Surface treatment, such as coating, compressing, condensing, impregnating or insulating; (CH)

(2) If the criteria of subparagraph (a) above are not satisfied, the country of origin of the goods shall be the country of origin of the blank. (US) (CH) (AUS)]

[B. Finished goods or parts produced from unfinished goods or parts, other than blanks: (CH) (**Issue No.3**)

Whenever the change of classification rules set out for goods of chapters 84 to 90 and 93 are not determinant of the country of origin of the good, the following substantial transformation rules are to be applied:

- (a) A finished good or part produced from a non-originating unfinished good or part classified in the same heading or subheading as the finished good or part shall originate in the country in which the good or part was finished, provided:
 - (i) the unfinished good or part is not functioning for its ultimate use in its imported condition and has undergone at least two or more of the following processes:
 - assembly by built-up such as but not limited to welding, soldering, shrinking, bolting, glueing, fitting, fixing, spooling, winding, connecting, wiring, coupling; or
 - heat treatment or thermochemical treatment such as glowing, tempering, hardening; or

- treatment for the purpose of shaping, forming such as cold or warm forming; or
- mechanical treatment, refining of form-, positional- and surface tolerances of functional finished shapes such as turning, milling, drilling, broaching, grinding, polishing, honing, eroding; or
- surface treatment such as coating, compressing, condensing, impregnating (excluding temporary conservation for transport and/or storage purpose), insulating; or
- system engineering, software-development and application;

and

- (ii) The finished good or part has undergone final testing such as but not limited to balancing, spinning, voltage testing, performance- or isolation test.
- (b) A finished good or part, produced from a non-originating good or part, classified in the same subdivision as the finished good or part which do not satisfy the conditions mentioned in Rule 2.B(a) above shall originate in the country contributing most to the product in terms of total value of parts (including an unfinished good) and related processing activities.” (CH)]

[C. [Other (US)] [Chapter Residual Rules (Sec)]: (Issue No.1)

Where neither the product specific rules in the matrix nor the preceding legal notes are determinant of origin, the following shall apply: (US) (CH) (AUS) (TUR for ex 8471.60(a) for split subheadings (A) and (B) only)

- (1) Goods produced by assembly of 5 or more parts (other than parts of general use, as defined in [Note 2 to Section XV or similar parts of plastic (Chapter 39) (US)] [note 1(g) to Section XVI of the HS (AUS)]) shall have origin in the country of assembly, or (US) (AUS) (TUR for ex 8471.60(a) for split subheadings (A) and (B) only)
- (2) Goods produced as a result of processing non-originating components into a device or apparatus capable of performing one or more new mechanical or electrical functions shall have origin in the country of such processing, or (US) (TUR for ex 8471.60(a) for split subheadings (A) and (B) only)
- (3) [Residual rule].— Goods produced by the assembly of less than 5 parts (other than parts of general use, as defined in Note 2 to Section XV of the HS or similar parts of plastic (Chapter 39)), and one or more of whose parts (other than parts of general use, as defined in [Note 2 to Section XV of the HS

or similar parts of plastic (Chapter 39) (US)] [note 1(g) to Section XVI of the HS (AUS)]) satisfies the requirements for origin in the country of assembly, shall have origin in the country of assembly. (US) (AUS) (TUR for ex 8471.60(a) for split subheadings (A) and (B) only)

(4) *[For the purposes of Paragraph 2.C above (Sec)]* the following shall not be considered origin conferring operations:

- (i) the attachment of machinery to a base; (US) (CH) (JPN) (AUS)
- (ii) the [installation (US)] [attachment (JPN)] of machinery or apparatus into cabinets or similar encasements; (US) (CH) (JPN) (AUS)
- (iii) the attachment of parts of general use (as defined in [Note 2 to Section XV of the HS or similar parts of plastic (Chapter 39) (US)] [note 1(g) to Section XVI of the HS (CH) (JPN) (AUS)]); (US) (CH) (JPN) (AUS)
- (iv) the attachment of handles, dials, knobs, hand cranks, and other consumer-operated controls; (US) (CH) (JPN) (AUS)
- (v) the attachment of a power cord, [change of mains voltage/frequency by adding transformer, adapter or converter (TUR)] (US) (CH) (AUS)
- (vi) installation of batteries, accumulators, [sensors, thermostats (TUR)] or [other (US)] [similar (JPN)] articles not designed to [or supplied (deletion proposed by US)] become a permanent part of the good; (US) (CH) (JPN) (AUS)
- (vii) the attachment of accessories or parts (including printed circuits with components assembled thereon), which serve only to enhance the operation of the machine or device; (US) (AUS)
- (viii) presetting, adding, changing parameters and settings of a programme in a machine, equipment or electronic equipment; (TUR)
- (ix) Adding manuals, warranty cards, conformance certificates to standards with or without test, adding brand, name and/or model labels or relabeling; (TUR)
- (x) Loading new software, version or different user language; (TUR)]

[3. Product specific residual rules (US) (**Issue No.77 – OC0023E2**)

Chapter 87

When application of the primary rules of this Chapter (including the product specific rules provided in the matrix) does not result in a determination of a country of origin, the country of origin shall be determined as follows:

1. The country of origin of safety seat belts of heading 87.08 that were assembled from narrow woven fabrics of heading 58.06 is the country where the fabrics were formed, or in the case of such a good containing textile fabrics of more than one country, the origin of the good is the country in which the textile fabric that predominates by weight was formed.

Chapter 88

When application of the primary rules of this Chapter (including the product specific rules provided in the matrix) does not result in a determination of a country of origin, the country of origin shall be determined as follows:

1. The country of origin of a parts of and accessories to parachutes (including dirigible parachutes and paragliders) and rotochutes of heading 88.04 is the country where the fabrics were formed, or in the case of such a good containing textile fabrics of more than one country, the origin of such good is the country in which the textile fabric that predominates by weight was formed.]

4. Criteria to apply the residual rules of Appendix 2, Rule 2 (**Architecture, Issue No.1**)

The criteria to apply the residual rules of Appendix 2, Rule 2 for Chapters 84 to 90 are:

- (a) value (EC);
- (b) number of units or components (US);
- (c) essential characters (CAN);
- (d) essential characters for Chapters 84 and 85; weight for Chapters 86 to 90 (JPN);
- (e) total value of parts (including unfinished goods) and the related processing activities (CH).

5. Definitions (**Issue No.2**)

- (a) *[The term “blank” means an article, not ready for direct use, having the approximate shape or outline of the finished article or part, and which can only be used, other than in exceptional cases, for completion into the finished article or part (e.g., bottle preforms of plastics*

being intermediate products having tubular shape, with one closed end and one open end threaded to secure a screw type closure, the portion below the threaded end being intended to be expanded to a desired size and shape.] (Sec)

6. Method of calculating the ad valorem percentage prescribed in Origin Criteria: (EC) **(Issue No.1)**

For the purposes of calculating the percentage of the value added requested:

- (a) The term “ex works price” shall mean the price paid for the product obtained to the manufacturer in whose undertaking the last working or processing is carried out. The ex-works price shall include the value of all materials used in manufacture and all costs (material costs as well as other costs) effectively incurred by the manufacturer. Internal taxes which are, or may be, repaid when such product is exported or commercial price reductions shall not be taken into account.
- (b) The terms “value acquired as a result of working and processing” and “incorporation of parts originating in the country of manufacture” shall mean the increase in value resulting from the assembly itself, together with any preparatory, finishing and checking operations, and from the incorporation of any parts originating in the country where the operations were carried out, including profit and general costs borne in that country as a result of these operations.
