5.	<b>Title, language and number of pages of the notified document:</b> Proposed Amendment to the Food and Drug Regulations (1378 — Fluazifop-butyl) (available in English and French; pages 871-874)
6.	<b>Description of content:</b> The Pest Management Regulatory Agency (PMRA) of Health Canada has recently approved an application to amend the registration of fluazifop-butyl in order to allow its use for the control of quackgrass in blueberries as a post-emergent treatment. This proposed regulatory amendment would establish a Maximum Residue Limit (MRL) for residues of fluazifop-butyl resulting from this use in blueberries, in order to permit the sale of food containing these residues.  After the review of all available data, the PMRA has determined that an MRL for fluazifop-butyl of 0.1 p.p.m. in blueberries would not pose an unacceptable health risk to the public. This proposed regulatory amendment would also amend the English chemical name of fluazifop-butyl in order to comply with international nomenclature conventions.
