
**Committee on Agriculture
Special Session**

TARIFF QUOTA ADMINISTRATION METHODS AND TARIFF QUOTA FILL

Background Paper by the Secretariat

1. At the first Special Session of the Committee on Agriculture on 23-24 March 2000, it was agreed that the Secretariat would provide, *inter alia*, a background paper on tariff quota administration methods and tariff quota fill based on notifications in this area (G/AG/NG/1, paragraph 7(a) refers).¹ This paper revises and further updates the information compiled from Members' Schedules and notifications which was provided as document G/AG/NG/S/8 dated 26 May 2000 and G/AG/NG/S/8/Rev.1 dated 18 May 2001. This update takes into account the notifications received by the Secretariat up to 8 March 2002, as well as the information provided during the review process undertaken by the Committee on Agriculture.
2. The paper covers methods of tariff quota administration and tariff quota fill. As principal point of reference, the tariff quotas set out in Part I, Section I-B of Members' Schedules (or, in the case of Brazil and the United States, Part I, Section I-A) are used. However, the paper also takes into account modifications via technical rectifications, Article XXVIII negotiations or Article XXIV:6 negotiations. In the case of the European Communities, the draft Schedule for the EC-15 is used as the point of reference as this is the basis on which the European Communities' Table MA:1 and MA:2 notifications were submitted to the Committee on Agriculture.² The information presented covers the 1995-2001 implementation years.³
3. For the purposes of this paper, the tariff quotas have been categorized according to principal administration methods and additional conditions. In the main body of the paper, information is provided on tariff quota fill rates for the 1995-2001 implementation years in relation to (i) categories of principal administration methods and (ii) additional conditions. Annex A lists the product categories used in compiling the information while Annex B presents a set of detailed tables. Finally, a complete listing of Members' tariff quotas, their respective administration methods, and the corresponding fill rates in the 1995-2001 implementation years is provided in the Attachment to this paper.
4. Throughout this paper, "n.a." has been used to signify "not available", i.e. (i) no notification has been received by the Secretariat by 8 March 2002, or (ii) imports under generally-applied in-quota rates were not reported, or (iii) the data relating to the tariff quota were aggregated with another tariff

¹ For the purposes of this paper, including in the headings of the tables, "tariff quotas" should be taken as meaning "tariff and other quotas".

² For additional technical aspects concerning the tariff quotas see the Secretariat's paper TN/AG/S/5 dated 21 March 2002.

³ The term "implementation year" is used as short-hand for the relevant calendar, financial, or marketing year (G/AG/W/2/Rev.4 refers).

quota, or (iv) the country concerned was not a Member in the relevant period. "-" has been used to signify "zero".⁴ Blanks indicate that the case at issue was not identified in notifications.

Categories of tariff quota administration methods

5. In order to facilitate the analysis of tariff quota administration methods, the Secretariat has, following an examination of Table MA:1 notifications and the summary reports of the Committee on Agriculture, derived categories of principal administration methods (Table 1) and categories of additional conditions (Table 2).

Table 1: Categories of principal administration methods

Code	Description
AT	- "applied tariffs": No shares are allocated to importers. Imports of the products concerned are allowed into the territory of the Member in unlimited quantities at the in-quota tariff rate or below.
FC	- "first-come, first-served": No shares are allocated to importers. Imports are permitted entry at the in-quota tariff rates until such a time as the tariff quota is filled; then the higher tariff automatically applies. The physical importation of the good determines the order and hence the applicable tariff.
LD	- "licences on demand": Importers' shares are generally allocated, or licences issued, in relation to quantities demanded and often prior to the commencement of the period during which the physical importation is to take place. This includes methods involving licences issued on a first-come, first-served basis and those systems where licence requests are reduced pro rata where they exceed available quantities.
AU	- "auctioning": Importers' shares are allocated, or licences issued, largely on the basis of an auctioning or competitive bid system.
HI	- "historical importers": Importers' shares are allocated, or licences issued, principally in relation to past imports of the product concerned.
ST	- "imports undertaken by state trading entities": Import shares are allocated entirely or mainly to a state trading entity which imports (or has direct control of imports undertaken by intermediaries) the product concerned.
PG	- "producer groups or associations": Import shares are allocated entirely or mainly to a producer group or association which imports (or has direct control of imports undertaken by the relevant Member) the product concerned.
OT	- "other": Administration methods which do not clearly fall within any of the above categories.
MX	- "mixed allocation methods": Administration methods involving a combination of the methods as set out above with no one method being dominant.
NS	"non-specified": Tariff quotas for which no administration method has been notified.

⁴ See Country Notes in Annex A of TN/AG/S/5 for additional technical details, including the aggregation practices used by some Members.

Table 2: Categories of additional conditions

Code	Description
d	- "domestic purchase requirement": An additional condition requiring the purchase or absorption of domestic production of the product concerned in order to be eligible to secure a share of the tariff quota.
l	- "limits on tariff quota shares per allocation": An additional condition involving the specification of a maximum share or quantity of the tariff quota for each importer or shipment.
x	- "export certificates": An additional condition requiring the submission of an export certificate, certificate of authenticity, certificate of origin, or any kind of export licence issued by the exporting country concerned in order to be eligible to secure a share of the tariff quota.
h	- "past trading performance": An additional condition limiting eligibility to secure a share of the tariff quota to established importers of the product concerned although allocations are not made in proportion to past trade shares.
o	- "no other conditions": None of the above were identified.

6. Following the establishment of these categories, the Secretariat, in a first step, classified each tariff quota according to the principal administration method. In a second step, this classification of tariff quotas was further elaborated by using, where evident from the notifications, additional conditions as set out in Table 2. This list of additional conditions is not exhaustive, nor is it suggested that they necessarily impede trade or tariff quota fill. They are readily identifiable conditions some of which have already been the focus of detailed discussions in the Committee. These additional conditions concern limits on the eligibility of entities that can participate under the relevant principal allocation method set out in Table 1 (e.g. although licences may be issued on demand, only certain entities such as traditional importers of the products concerned are entitled to apply for licences) and other conditions which have to be met (e.g. the purchase or absorption of domestic production, the submission of an export licence from exporting countries, or limits on the maximum share of the tariff quota per allocation). In some cases more than one such condition applies and in other cases none was identified.

7. After classification of each tariff quota through this two-stage process, the Secretariat received a number of suggestions for changes, most of which are reflected in this paper. In some cases, however, specific suggestions were not incorporated in order to ensure consistent treatment among Members. The assigned administration methods and additional conditions should generally be considered as indicative and may not perfectly match the description of the category concerned.

8. As evident from the Attachment, there are currently 43 Members with a total of 1425 individual tariff quotas specified in their Schedules (excluding four tariff quotas where the initial and final quantity levels are specified to be zero).⁵ The number of applicable tariff quotas varies throughout the implementation period for the reasons specified in paragraph 16 of document TN/AG/S/5. The annual compilation of the tariff quotas which are included in, or excluded from, the present analysis is also given in Table 4 of TN/AG/S/5.

⁵ For the tariff quotas with zero initial and zero final tariff quota quantities, see the Schedules of Morocco and Venezuela.

9. In 1995-2001, the principal administration method of roughly half of all applicable tariff quotas was "applied tariffs" (Table 3). "Licences on demand" systems accounted for another quarter. The "other" category largely covers five administration methods for which no separate categories were established since they are not frequently used: (i) Canada allocates broiler hatching eggs and chicks to federally-registered hatcheries on the basis of the number of chicks hatched by them in a 12-month period preceding the allocation (market share system); (ii) the INCOMEX Import Committee in Colombia issues import licences for poultry cuts subject to *"the criterion of protecting the domestic industry"*; (iii) Israel applies a lottery system to certain tariff quotas; (iv) Japan's import system applied to condensed milk and milk powder used for consumption by international maritime vessels and international airlines; and (v) the Philippines administered 6 tariff quotas on the basis of a "market share system" in 1995 and 1996.⁶ This system was replaced in 1997.

10. In a number of cases, it proved difficult to identify the principal administration method, because several methods were in place. For example, most dairy tariff quotas of the United States are administered by allocating a large share of the tariff quota concerned to historical importers, but significant shares are also allocated by lottery or an "exporter designated" method, both of which fall into the "other" category. These tariff quotas, and similar cases, were assigned to the "mixed" category since the administration methods are a mix of the "historical importers" and the "other" categories.

Table 3: Tariff quotas by principal administration method, 1995-2001

	Number of tariff quotas						
	1995	1996	1997	1998	1999	2000	2001
Applied tariffs	654	642	673	665	656	639	631
First-come, first-served	101	103	147	147	146	153	153
Licences on demand	290	299	302	298	310	297	324
Auctioning	41	39	59	59	59	52	52
Historical importers	68	82	88	97	97	119	100
Imports undertaken by state trading enterprises	22	22	20	19	20	20	21
Producer groups or associations	8	8	7	7	7	9	8
Other	12	13	7	7	7	9	8
Mixed allocation methods	54	55	58	59	60	60	60
Non-specified	9	10	6	6	14	7	20
Total number of applicable tariff quotas	1259	1273	1367	1364	1376	1365	1377

11. Table 4 shows the incidence of additional conditions in connection with principal administration methods. For most of the tariff quotas, the notifications contain none of the additional conditions as defined in Table 2. Out of the total membership, only 19 Members have taken recourse to such additional conditions. Throughout 1995-2001, around one-fifth of all applicable tariff quotas

⁶ In a comment to the Secretariat, the Philippines pointed out that the tariff quotas concerned were allocated in proportion to historical trade shares on the domestic market rather than on the basis of historical import shares, since imports were previously banned or minimal.

were subject to one or more of the seven additional conditions specified in Table 5. The most frequently used additional condition was "limits on tariff quota shares per allocation".⁷ In a few cases, a combination of "domestic purchase requirements" with "limits on tariff quota shares" (one case) or with "past trading performance" (two cases) was applied. In five cases, a combination of "export certificates" with "past trading performance" was applied.

Table 4: Additional conditions in connection with principal administration methods, 1995-2001

Additional conditions	Number of tariff quotas							Number of Members						
	95	96	97	98	99	00	01	95	96	97	98	99	00	01
Domestic purchase requirements	50	50	50	49	47	48	48	5	5	5	5	5	6	6
Limits on tariff quota shares	106	116	122	114	111	106	106	6	7	7	7	7	7	7
Export certificates	26	26	25	25	25	24	25	2	3	2	2	2	2	3
Past trading performance	60	58	58	57	62	63	92	8	8	8	8	8	9	9
Domestic purchase requirements + limits on tariff quota shares	-	-	-	-	1	1	1	-	-	-	-	1	1	1
Domestic purchase requirements + past trading performance	-	-	-	-	-	-	2	-	-	-	-	-	-	1
Export certificates + past trading performance	3	3	3	3	3	4	5	2	2	2	2	2	2	2
Total	245	253	258	248	249	246	279	16	17	17	17	17	19	19

12. Tables B.1 to B.6 of Annex B provide a summary *by Member* for 1995-2000 of the number of tariff quotas assigned to each of the principal administration methods. Annex Tables B.7 to B.12 provide a breakdown of principal administration methods *by product category* for 1995-2000. The product categories are listed in Annex A. They are the same as set out in Annex A of TN/AG/S/5.

Tariff quota fill in relation to administration methods

13. Of the total of 1425 scheduled tariff quotas, fill rates are calculated for 1028, 1081, 1166, 1134 and 849 tariff quotas in the respective years 1995-2000.

14. For reasons of consistency among Members, the fill rates used in this paper are calculated only up to 100 per cent, i.e. they do not take into consideration "overfilled" tariff quotas. The fill rate is calculated as imports in per cent of the notified volume of the tariff quota (from the Table MA:2 notification). It should be noted, however, that in some cases this notified volume differs from the scheduled quantity (as shown in the Attachment to TN/AG/S/5).

15. All averages of tariff quota fill rates are calculated as simple averages. Obviously, simple averages have inherent weaknesses, such as masking the differences in terms of quantity and commercial value of the tariff quota product concerned.

⁷ Hungary advised the Secretariat that its tariff quota administration limits the volume that a licence applicant may request per application but not the overall tariff quota share per applicant. At this stage, assignment of this additional condition is made to capture *any* type of quantitative limit on licence applicants, the nature of the limitation being not always clear from the notifications; hence, the classification of Hungary has not been changed.

16. The simple average tariff quota fill rates with respect to each of the principal administration methods are shown in Table 5, together with the number of tariff quotas which are included in the calculation of the averages for each category. The simple average fill rates in the bottom line of Table 5 represent the average of the fill rates of all tariff quotas for which data were available.

17. In Tables B.13 to B.18 of Annex B, simple average fill rates are broken down by principal administration method and presented in terms of their frequency distribution for 1995 through 2000, respectively. For each of the principal administration methods, the total number of tariff quotas is split into five specified intervals of simple average tariff quota fill rates (i.e. 0-20 per cent, etc.).

Table 5: Tariff quotas - simple average fill rates by principal administration method, 1995-2000

Principal administration method	Simple average fill rates (%)						Number of tariff quotas included					
	1995	1996	1997	1998	1999	2000	1995	1996	1997	1998	1999	2000
Applied tariffs	71	65	65	70	70	68	489	489	525	502	383	310
First-come, first-served	56	61	47	51	64	60	87	95	144	144	76	51
Licences on demand	58	57	54	54	51	51	266	289	277	273	251	236
Auctioning	26	32	51	34	23	32	39	36	55	43	35	11
Historical importers	91	77	73	69	63	58	62	79	84	93	60	66
Imports by state trading enterprises	81	83	90	91	71	72	22	22	20	19	8	8
Producer groups/associations	74	53	85	78	86	83	8	8	7	7	4	6
Other	56	61	93	91	99	95	10	11	5	5	4	6
Mixed allocation methods	74	83	84	84	73	44	44	45	43	43	23	5
Non-specified	100	44	57	44	41	86	1	7	6	5	5	1
Overall	66	63	62	63	62	60	1028	1081	1166	1134	849	700

18. A more detailed summary of simple average tariff quota fill rates, broken down by principal administration method, is contained in Annex B of this paper: in Tables B.19 to B.24 the information is summarized *by Member*, and in Tables B.25 to B.30 the simple average fill rates are listed *by product category* for 1995 through 2000, respectively.

19. Table 6 presents a comparison in terms of the simple average fill rates by principal administration method between tariff quotas where the quantities are scheduled to remain unchanged over the relevant implementation period for the Member concerned and tariff quotas where the quantities are to increase.⁸ There are five tariff quotas whose quantities are to decrease over the implementation period.⁹ These are included in the calculation of simple average fill rates for the "constant" tariff quotas.

⁸ Tariff quotas which are to increase over the relevant implementation period are identified by asterisks in the Secretariat's paper TN/AG/S/5 (Attachment, Section 1).

⁹ The decreases represent the phasing out of three tariff quotas in Korea and two Swiss tariff quotas affected by technical rectifications.

Table 6: Constant vs. increasing tariff quotas - Simple average fill rates by principal administration method, 1995-2000

Principal administration method	Simple average fill (%)											
	Constant quantities						Increasing quantities					
	1995	1996	1997	1998	1999	2000	1995	1996	1997	1998	1999	2000
Applied tariffs	73	66	67	71	69	67	64	58	56	68	74	70
First-come, first-served	67	70	49	54	70	67	37	42	40	45	53	48
Licences on demand	69	65	66	66	63	59	47	49	43	41	40	42
Auctioning	46	93	85	46	15	65	22	22	46	32	24	28
Historical importers	96	84	84	74	68	68	85	68	58	62	56	45
Imports by state trading enterprises	100	100	99	100	100	100	76	79	88	88	61	63
Producer groups/associations							74	53	85	78	86	83
Other	100	80	100	100	100	100	27	50	84	77	99	91
Mixed allocation methods	74	84	80	82	65	73	74	82	87	86	78	1
Non-specified	100	51	57	44	41	86		-				
Simple average fill rate	73	68	66	68	67	65	55	54	53	55	51	51
Number of tariff quotas included	650	680	750	744	556	449	378	401	416	390	293	251

Note: For a breakdown of the number of tariff quotas included by principal method of allocation see Table B. 43 of Annex B.

20. Tables 7 to 12 show the simple average fill rates of combinations of principal administration methods and additional conditions during the 1995-2000 implementation years. Given the limited number of notifications received for the 2001 implementation year, the corresponding table is not presented. The right-hand columns indicate the simple average fill rates of all tariff quota administrations where relevant additional conditions are specified (e.g., the simple average tariff quota fill rate of administration methods with domestic purchase requirements is 85 per cent in 1996).

Table 7: Tariff quotas - Simple average fill rates by principal administration method and additional conditions in 1995 (per cent)

Additional conditions	AT Applied tariffs	FC First-come, first-served	LD Licences on demand	AU Auctioning	HI Historical importers	ST State trading	PG Producer groups	OT Other methods	MX Mixed methods	NS Non-specified	Simple average fill by additional condition

21. In Annex Tables B.31 to B.36, the *number of tariff quotas* in each category of additional conditions are listed by Member. Annex Tables B.37 to B.42 provide a summary of *simple average tariff quota fill rates* for each category of additional conditions, by Member.

Annex A

Product categories and their content

Code	Broad product categories	Indicative list of content
CE	Cereals	Wheat and wheat flour, oats, barley, maize, rice, other grains, aggregated cereals tariff quotas (e.g. wheat and barley), processed cereals (including pasta, animal feed, etc.)
OI	Oilseeds products	Oilseeds, vegetable oils, oil cakes, aggregated oilseeds tariff quotas
SG	Sugar and sugar products	Sugar, processed sugar-containing products, aggregated sugar and sugar products tariff quotas
DA	Dairy products	Milk and cream (not concentrated), milk powder, butter and butter oil, cheese, other milk products, aggregated dairy products tariff quotas
ME	Meat products	Bovine meat, pigmeat, poultry meat, sheepmeat, live animals, aggregated meat tariff quotas (e.g. beef and sheepmeat), processed animal products
EG	Eggs and egg products	Eggs, other egg products, aggregated egg and products tariff quotas
BV	Beverages	Wine, non-alcoholic beverages (e.g. water), other alcoholic beverages, aggregated beverages tariff quotas (not fruit juices)
FV	Fruit and vegetables	Pip fruit, citrus fruit, other fruit, aggregated fruit tariff quotas, processed fruit (including juices, jams, etc.), potatoes, other vegetables, aggregated vegetables, processed vegetables
TB	Tobacco	Tobacco, other tobacco products, aggregated tobacco tariff quotas
FI	Agricultural fibres	Cotton, silk, other fibres
CO	Coffee, tea, spices and processed agricultural products from mixed ingredients	Coffee, tea, cocoa, spices, honey, other spices, etc. (this also includes processed products such as infant formula and homogenised foods, sauces, soups, etc.)
OA	Other agricultural products	Other agricultural products (e.g. Chapter 5 of the Harmonized System) and most non-Chapters 1 to 24 products such as dextrins, animal pelts, etc.

Annex B

Detailed tables

Note: "All" in the following tables represents the simple average of the fill rates of all tariff quotas included in the respective analysis.

Note: The information in this table relates to Table 7 of this paper and indicates the number of "constant" and "increasing" tariff quotas for which tariff quota fill data are available.

ATTACHMENT

LISTING OF TARIFF QUOTAS, FILL RATES AND THEIR RESPECTIVE ADMINISTRATION METHOD ¹⁰

In the attached information, the tariff quotas are presented in the same order as in TN/AG/S/5. The following abbreviations are used for the columns:

REF ¹¹	COLUMN 1: a number for reference purposes from 1 (the first tariff quota for Australia) to 1425 (the last tariff quota for Venezuela);
MENO	COLUMN 2: a number indicating the tariff quota for each Member. Tariff quotas have been included in the same order as in the relevant Schedules. This number can be used to see the different number of tariff quotas of each Member: from 1 in Chile to 232 in Norway;
DESCRIPTION	COLUMN 3: the product description of the tariff quota taken from Schedules (in the original language). Certain descriptions have been abridged;
PRO	COLUMN 5: a code representing broad product groups into which each tariff quota has been assigned (see Annex A of this paper for details of the categories).
REG	COLUMNS 6, 8, 10, 12, 14, 16 and 18: a code indicating the principal administration method in the implementation years, 1995-2001 respectively (for the codes see Table 1 of this paper).
ADC	COLUMNS 7, 9, 11, 13, 15, 17 and 19: a code indicating any additional condition in the implementation years, respectively (for the codes see Table 2 of this paper).
FILL RATES	COLUMNS 20 to 26: Tariff quota fill rates (in per cent) are listed these columns for each of the implementation years. In order to put the calculation of tariff quota fill rates (measured throughout in per cent) on an equal footing between Members, the fill rates are adjusted for cases where notified imports are greater than tariff quota quantities by setting a maximum of 100% tariff quota fill. It is this fill measure which is used throughout this paper.

¹⁰ Original language only.

¹¹ In the case of acceding countries, the relevant tariff quotas have been included as "applicable tariff quotas" starting with the year specified in the relevant Schedule, irrespective of the precise implementation date specified within this year and of whether the newly-acceded Member has submitted a Table MA:1 notification. This procedure is without prejudice to the legal status of the tariff quotas and the related obligations of the Members concerned, the only reason for this procedure being to use a systematic approach for purposes of this paper.
