NOTIFICATION

Addendum

The following communication, dated 10 October 2001, has been received from the United States.

Organophosphate Pesticides; Availability of Risk Management Decision Documents

The Environmental Protection Agency (EPA) announces the availability of the risk management decision documents for four organophosphate pesticides, ethyl parathion G/SPS/N/USA/235, phorate G/SPS/N/USA/183, phosalone G/SPS/N/USA/217, and temephos G/SPS/N/USA/188. The earlier documents in the reassessment process for these pesticides were notified under the numbers listed. These decision documents have been developed as part of the public participation process that EPA and U.S. Department of Agriculture (USDA) are now using for involving the public in the reassessment of pesticide tolerances under the Food Quality Protection Act (FQPA), and the reregistration of individual organophosphate pesticides under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA).

The full text of the 10 October 2001 Federal Register notice on these decision documents (which includes instructions for obtaining the decision documents electronically) is available from the address below.
