Committee on Sanitary and Phytosanitary Measures

Original: English

NOTIFICATION

Addendum

The following communication, received on 3 June 2004, is being received from the Delegation of the United States.

Revocation of Tolerance Exemptions for Certain Biopesticides.

This document proposes to revoke exemptions from the requirement of a tolerance, as expressed in 40 CFR part 180, on residues of the following pesticide active ingredients because there are no active Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) product registrations applicable to these exemptions: Dihydroazadirachtin; Kontrol HV; Metarhizium anisopliae strain ESF1 in attractant stations; polyhedral occlusion bodies of Autographa californica NPV; Pseudomonas fluorescens EG-1053; Pseudomonas fluorescens NCIB 12089; and Puccinia canaliculata ATCC (40199). In addition, this document proposes to revoke the tolerance exemption for Bacillus thuringiensis CryIA(b) delta-endotoxin and the genetic material necessary for its production in corn because that tolerance exemption has been replaced by a tolerance exemption that applies to all plants.

This regulation is effective 22 July 2004. Objections and requests for hearings must be received on or before 22 June 2004.
