### EXPLANATORY NOTES

#### Symbols

The following symbols have been used with the following meanings in the statistical tables:

- ... not available
- nil or negligible
- \* provisional figures, subject to revision

#### *Sources*

In preparing the Summary Tables, the Secretariat based itself mainly on replies to questionnaires, other information submitted by participants and observers as well as various information arising from the operation of the former Protocol Regarding Certain Milk Powders, the Protocol Regarding Milk Fat and the Protocol Regarding Certain Cheeses. Furthermore, the Secretariat used supplementary information available to it from various national and international sources, notably documentation from the FAO, the UN/Economic Commission for Europe, the OECD, the IDF, the Commission of the European Communities, Agriculture Canada and the United States Department of Agriculture.

#### *Notes relating to data of individual countries*

The data shown with respect to consumption, relate to apparent consumption, as calculated by the Secretariat.

Certain countries have not been included in all the tables either because the quantity of trade has been insignificant, or because figures have not been available.

For some countries, data for butter include anhydrous milk fat.

Figures for **Australia** for skimmed milk powder also includes skimmed milk powder and buttermilk powder mixtures, and skimmed milk powder modified. Stocks are those held by manufacturers. Cheese stock figures only include Cheddar, Gouda and stirred curd/granular cheeses. Figures for exports and exports by destination may be different due to the use of different sources.

For **Bulgaria**, cheese figures include Kashkaval.

For the **European Community**, data for milk deliveries since 1991 include the former German Democratic Republic and Portugal, but does not include Austria, Finland and Sweden. Changes in Italian dairy statistics introduced in 1992 make direct comparisons with previous years inaccurate.

**EC** stocks of skimmed milk powder and butter include public intervention stocks and private stocks. Cheese stocks include intervention stocks (public stocks for Grano-Padano and Parmigiano Reggiano) and stocks qualifying for aid for private storage.

For **Finland**, stock figures refer to wholesale stocks of dairies.

For **Hungary**, stock figures and production figures of milk powders for 1990 include all types of milk powders.

For **Japan**, figures refer to stocks of whole milk powder held by manufacturers, whereas for skimmed milk powder and butter, the data refer to stocks held by manufacturers as well as the Livestock Industry Promotion Corporation. Cheese production figures are estimates.

All stock figures for **New Zealand** include export and local market stocks. Government stocks are nil. Skimmed milk powder statistics include partly skimmed and cream powder. Whole milk powder statistics include infants' food.

For **Norway**, cheese figures include whey cheese and processed cheese.

Cheese figures for **Poland** include ripening and processed cheeses only.

Butter production figures for **Sweden** do not include "Bregott".

Annual exports of milk powders for **Switzerland** include food aid, while quarterly exports do not. Butter figures include resolidified butter. Quarterly figures for cheese production are estimates. Processed cheeses are not included in the statistics. Cheese stock figures include Emmental, Gruyère, Sbrinz, Tilsit and Appenzell.

For **Austria**, stocks include only products of domestic origin. Figures for skimmed milk powder include skimmed milk powder and buttermilk powder. Cheese consumption figures reflect sales of domestic produce only.

For **Canada**, butter figures refer to creamery butter only; whey butter is not included. Cheese figures include Cheddar and other whole milk cheeses.

**United States** data on stocks of milk powders refer to **CCC** stocks. Exports of whole milk powder include partly skimmed powder, dry whole milk and cream.

## COMMENTAIRE

## NOTES EXPLICATIVES

*(notes identiques pour tous les tableaux)*

**Signes**

Les signes suivants ont été utilisés dans les tableaux statistiques:

- ... chiffre non disponible
- néant ou quantité négligeable
- \* chiffre provisoire sujet à révision

**Sources**

Cette annexe statistique se fonde principalement sur les réponses aux questionnaires, les autres informations présentées par les participants et les observateurs ainsi que sur les informations résultant de l'application du précédent Protocole concernant certaines poudres de lait, du Protocole concernant les matières grasses laitières et du Protocole concernant certains fromages. D'autres sources nationales et internationales ont également été utilisées, notamment la documentation en provenance de la FAO, de la Commission économique pour l'Europe des Nations Unies, de l'OCDE, de la Fédération internationale de laiterie (FIL), de la Commission des Communautés européennes, du Ministère de l'agriculture du Canada et du Département de l'agriculture des États-Unis.

**Notes relatives aux données concernant les différents pays**

Les chiffres indiqués, en ce qui concerne la consommation, se rapportent à la consommation apparente, telle qu'elle a été calculée par le secrétariat.

Certains pays ne figurent pas dans tous les tableaux soit parce que le quantum des échanges était insignifiant soit parce que les chiffres n'étaient pas disponibles.

Dans les statistiques de certains pays, les chiffres relatifs aux matières grasses laitières anhydres sont inclus dans ceux qui concernent le beurre.

Pour l'**Australie** les chiffres concernant la poudre de lait écrémé comprennent également la poudre de lait partiellement écrémé, la crème en poudre, les mélanges de poudre de lait écrémé et de poudre de babeurre, et la poudre de lait écrémé modifiée. Les stocks sont ceux qui sont détenus par les fabricants. Les chiffres des stocks de fromages ne comprennent que le Cheddar, le Gouda et les fromages de caillebotte malaxée/granulés. Les chiffres pour les exportations et les importations par destinations peuvent différer à cause de l'utilisation de différentes sources.

En ce qui concerne la **Bulgarie**, la poudre de lait partiellement écrémé est comprise dans les statistiques de la poudre de lait entier. Les chiffres concernant le fromage comprennent le Kashkaval.

Les chiffres concernant les livraisons de lait de la **Communauté européenne** comprennent depuis 1991 l'ex-République démocratique allemande et le Portugal, mais ne comprennent pas l'Autriche, la Finlande et la Suède. La révision en 1992 des statistiques italiennes sur les produits laitiers fausse toute comparaison avec les années antérieures.

Les stocks de poudre de lait écrémé et de beurre des **CE** comprennent les stocks publics d'intervention et les stocks privés. Les stocks de fromages comprennent les stocks d'intervention (stocks

publics en ce qui concerne le Grano-Padano et le Parmigiano Reggiano) et les stocks remplissant les conditions requises pour bénéficier d'une aide au stockage privé.

En ce qui concerne la **Finlande**, les chiffres des stocks se rapportent aux stocks de gros pour laiteries.

En ce qui concerne la **Hongrie**, les chiffres des stocks et de la production des poudres de lait pour l'année 1990 comprennent toutes les variétés de laits en poudre.

En ce qui concerne le **Japon**, les chiffres se rapportent aux stocks de poudre de lait entier détenus par les fabricants, alors que dans le cas de la poudre de lait écrémé et du beurre, les chiffres se rapportent aux stocks détenus par les fabricants et par la Société pour la promotion de l'élevage. Les chiffres de la production de fromages sont des estimations.

En ce qui concerne la **Nouvelle-Zélande**, tous les chiffres des stocks comprennent les stocks exportables et les stocks des marchés locaux. Les stocks publics sont nuls. Les statistiques de la poudre de lait écrémé comprennent la poudre de lait partiellement écrémé et la crème en poudre. Les statistiques de la poudre de lait entier comprennent les aliments pour nourrissons.

En ce qui concerne la **Norvège**, les chiffres relatifs au fromage comprennent le fromage de lactosérum (petit-lait) et le fromage affiné.

Dans le cas de la **Pologne**, les chiffres relatifs au fromage ne comprennent que les fromages en maturation et les fromages affinés.

Pour la **Suède**, les chiffres de la production de beurre ne comprennent par le "Bregott".

Dans le cas de la **Suisse**, les exportations de lait en poudre destinées à l'aide alimentaire sont comprises dans les totaux annuels, mais pas dans les chiffres trimestriels. Les chiffres relatifs au beurre comprennent le beurre resolidifié. Les chiffres trimestriels de la production de fromage sont des estimations. Les fromages affinés ne sont pas compris dans les statistiques. Les chiffres des stocks de fromage comprennent l'Emmental, le Gruyère, le Sbrinz, le Tilsit et l'Appenzell.

En ce qui concerne l'**Autriche**, les stocks ne comprennent que les produits d'origine nationale. Les chiffres pour la poudre de lait écrémé comprennent aussi la poudre de babeurre. Les chiffres relatifs à la consommation de fromage ne prennent en compte que les produits nationaux.

En ce qui concerne le **Canada**, les chiffres relatifs au beurre se rapportent uniquement au beurre de crèmerie; le beurre de lactosérum (petit-lait) n'est pas inclus. Les chiffres relatifs au fromage comprennent le Cheddar et autres fromages de lait entier.

En ce qui concerne les **Etats-Unis**, les chiffres relatifs aux stocks de poudre de lait se rapportent aux stocks de la CCC. Les exportations de poudre de lait entier comprennent le lait partiellement écrémé, le lait entier sec et la crème.

## COMENTARIO

### NOTAS EXPLICATIVAS

*(mismas notas para todos los cuadros)*

#### *Signos convencionales*

En los cuadros estadísticos se han utilizado los signos que se indican a continuación:

- ... falta el dato
- cantidad nula o insignificante
- \* cifra provisional, sujeta a revisión

Base para los índices: Promedio 1985-1989 = 100

#### *Fuentes*

Para preparar el anexo estadístico, la Secretaría se ha basado principalmente en las respuestas a los cuestionarios y otros datos facilitados por los participantes y observadores, así como en diversa información derivada del funcionamiento del Protocolo relativo a Determinados Tipos de Leche en Polvo, el Protocolo relativo a las Materias Grasas Lácteas y el Protocolo relativo a Determinados Quesos. Además, la Secretaría ha utilizado información complementaria procedente de diversas fuentes nacionales e internacionales; en particular, documentación de la FAO, la Comisión Económica de las Naciones Unidas para Europa, la OCDE, la Federación Internacional de Lechería, la Comisión de las Comunidades Europeas, Agriculture-Canada y el Departamento de Agricultura de los Estados Unidos.

#### *Notas relativas a los datos de distintos países*

Las cantidades indicadas en concepto de consumo se refieren al consumo aparente, calculado por la Secretaría.

Algunos países no figuran en todos los cuadros, ya sea porque la cuantía de su comercio ha sido insignificante, o porque faltan las cifras.

En las estadísticas de algunos países las cifras de las grasas lácteas anhidras no aparecen desglosadas de las correspondientes a la mantequilla. Es posible, por lo tanto, que figuren todas en los datos relativos a esta última.

Las cifras de la leche desnatada en polvo correspondientes a **Australia** incluyen también leche parcialmente desnatada en polvo, nata en polvo, mezclas de leche desnatada en polvo, suero de mantequilla en polvo y leche desnatada en polvo modificada. Las existencias son las mantenidas por los fabricantes. Las cifras de las existencias de queso abarcan solamente Cheddar, Gouda y cuajada

agitada/quesos granulares. Es posible que las cifras de las exportaciones y de las importaciones por destino sean distintas porque se ha utilizado fuentes distintas.

En el caso de **Bulgaria**, las estadísticas de la leche entera en polvo incluyen también la leche parcialmente desnatada en polvo. En las cifras del queso se incluye el Kashkaval.

En los datos de entregas de leche de la **Comunidad Europea** desde 1991 están incluidas las de la antigua República Democrática Alemana y Portugal, pero no están incluidas las de la Austria, Finlandia y Suecia. Las comparaciones directas con años anteriores no son exactas debido a las modificaciones introducidas en 1992 en las estadísticas italianas sobre productos lácteos.

Las existencias de la **CE** de leche desnatada en polvo y mantequilla comprenden las existencias de intervención del sector público y las existencias del sector privado. Las existencias de queso incluyen las existencias de intervención (existencias públicas de Grana-Padano y Parmigiano Reggiano) y existencias acreedoras a la ayuda para el almacenamiento privado.

Las cifras de las existencias de **Finlandia** se refieren a las existencias al por mayor de las centrales lecheras.

En el caso de **Hungría**, las cifras de la producción y de las existencias de leche en polvo correspondientes a 1990 incluyen todos los tipos de leche en polvo.

Respecto del **Japón**, las cifras se refieren a las existencias de leche entera en polvo en manos de los fabricantes, mientras que en el caso de la leche desnatada en polvo y la mantequilla los datos corresponden no sólo a las existencias mantenidas por los fabricantes sino también a las de la LIPC (Corporación de Fomento de la Industria Pecuaria). Las cifras de la producción de queso son estimaciones.

En todas las cifras de las existencias de **Nueva Zelandia** figuran las existencias para la exportación y las destinadas al mercado interno. Las existencias oficiales son nulas. En las estadísticas de la leche desnatada en polvo figuran también la leche parcialmente desnatada y la crema en polvo. Las estadísticas de la leche entera en polvo incluyen los alimentos para lactantes.

Las cifras de **Noruega** referentes al queso incluyen el queso de suero y el queso fundido.

En el caso de **Polonia**, las cifras del queso comprenden únicamente los quesos de maduración y fundidos.

Las cifras de la producción de mantequilla de **Suecia** no incluyen "Bregott".

Las cifras anuales de exportaciones de leche en polvo correspondientes a **Suiza** comprenden las operaciones de ayuda alimentaria, pero estas exportaciones no se incluyen en las cifras trimestrales. Las cifras de mantequilla incluyen la mantequilla resolidificada. Las cifras trimestrales de la producción de queso son estimaciones. Las cifras de las existencias de queso comprenden Emmental, Gruyère, Sbrinz, Tilsit y Appenzell.

Las existencias de **Austria** incluyen únicamente productos de origen nacional. En las cifras de la leche desnatada en polvo se incluye también el suero de mantequilla en polvo. Las cifras correspondientes de consumo de queso abarcan sólo las ventas de productos nacionales.

En las cifras de **Canadá**, las relativas a la mantequilla corresponden únicamente a la mantequilla de mantequería; no se incluye la mantequilla de suero. Las cifras de los quesos abarcan el Cheddar y otros quesos de leche entera.

Los datos de los **Estados Unidos** sobre las existencias de leche en polvo corresponden a las existencias de la CCC. Las exportaciones de leche entera en polvo incluyen también las de leche parcialmente desnatada en polvo y las de nata en polvo.
