Sources

In preparing the Summary Tables, the Secretariat based itself mainly on replies to questionnaires, other information submitted by parties and observers as well as various information arising from the operation of the former Protocol Regarding Certain Milk Powders, the Protocol Regarding Milk Fat and the Protocol Regarding Certain Cheeses. Furthermore, the Secretariat used supplementary information available to it from various national and international sources, notably documentation from the FAO, the UN Economic Commission for Europe, the OECD, the IDF, the Commission of the European Communities, Agriculture Canada and the United States Department of Agriculture.

Notes relating to data of individual countries

The data shown with respect to consumption, relate to apparent consumption, as calculated by the Secretariat.

Certain countries have not been included in all the tables because either the quantity of trade has been insignificant, or because figures have not been available.

Figures for **Australia** for skimmed milk powder also include partially skimmed milk powder and buttermilk powder mixtures, and skimmed milk powder modified. Stocks are those held by manufacturers. Cheese stock figures only include Cheddar, Gouda and stirred curd/granular cheeses.

For **Bulgaria**, cheese figures include Kashkaval.

For the **European Community**, data since 1991 include the former German Democratic Republic and Portugal and the corresponding statistical series are referred to as EC12. As of 1995, the production estimates of the Community include those of Austria, Finland and Sweden, and the corresponding data series were referred to as EC. Changes introduced in the Italian dairy statistics in 1992 make direct comparisons with previous years inaccurate.

EC stocks of skimmed milk powder and butter include public intervention stocks and private stocks. Cheese stocks include intervention stocks (public stocks for Grano-Padano and Parmigiano Reggiano) and stocks qualifying for aid for private storage.

For **Finland**, stock figures refer to wholesale stocks of dairies.

For **Japan**, stock figures for whole milk powder refer to stocks held by manufacturers, whereas for skimmed milk powder and butter, the data refer to stocks held by manufacturers and by the Livestock Industry Promotion Corporation. Production of processed cheeses includes those made from imported natural cheeses.

All stock figures for **New Zealand** include export and local market stocks. Government stocks are nil. Skimmed milk powder statistics include partially skimmed and cream powder. Whole milk powder statistics include infants' food.

For **Norway**, cheese figures include whey cheese and processed cheese.

Cheese figures for **Poland** include ripening and processed cheeses only.

Butter production figures for **Sweden** do not include "Bregott".

Annual exports of milk powders for **Switzerland** include food aid, while quarterly exports do not. Butter figures include resolidified butter. Processed cheeses are not included in the statistics. Cheese stock figures include Emmental, Gruyère, Sbrinz, Tilsit and Appenzell.

For **Austria**, stocks include only products of domestic origin. Figures for skimmed milk powder also include buttermilk powder. Cheese consumption figures reflect sales of domestic produce only.

For **Canada**, butter figures refer to creamery butter only; whey butter is not included. Cheese figures include Cheddar and other whole milk cheeses.

United States data on stocks of milk powders refer to **CCC** stocks. Exports of whole milk powder include partially skimmed powder, dry whole milk and cream.

IDA TOTAL, calculated for the period 1991-94, refers to the statistics submitted by the former International Dairy Arrangement participants.

Sources

Ces Tableaux récapitulatifs se fondent principalement sur les réponses aux questionnaires, les autres informations présentées par participants et observateurs, ainsi que sur les informations résultant de l'application des trois précédents Protocoles concernant certaines poudres de lait, les matières grasses laitières et certains fromages. D'autres sources nationales et internationales ont également été utilisées, notamment la documentation en provenance de la FAO, la Commission économique pour l'Europe des Nations Unies, l'OCDE, la Fédération internationale de laiterie (FIL), la Commission des Communautés européennes, le Ministère de l'agriculture du Canada et le Département de l'agriculture des Etats-Unis.

Notes relatives aux données concernant les différents pays

Les chiffres concernant la consommation se rapportent à la consommation apparente, telle qu'elle a été calculée par le Secrétariat.

Certains pays ne figurent pas dans tous les tableaux, soit parce que le quantum des échanges était insignifiant, ou bien parce que les chiffres n'étaient pas disponibles.

Pour l'**Australie**, les chiffres concernant la poudre de lait écrémé comprennent également la poudre de lait partiellement écrémé, la crème en poudre, les mélanges de poudre de lait écrémé et de poudre de babeurre, et la poudre de lait écrémé modifiée. Les stocks sont ceux détenus par les fabricants. Les stocks de fromages ne comprennent que le Cheddar, le Gouda et les fromages de caillebotte malaxée/granulés.

En ce qui concerne la **Bulgarie**, les chiffres concernant le fromage comprennent le Kashkaval.

Les chiffres concernant la **Communauté européenne** comprennent, depuis 1991, l'ex-République démocratique allemande et le Portugal. Les séries statistiques correspondantes ont été dénomées EC12. Depuis 1995, les données estimant la production de la Communauté, incluent l'Autriche, la Finlande et la Suède, avec pour référence l'appellation EC. De plus, la révision en 1992 des statistiques italiennes sur les produits laitiers fausse toute comparaison avec les années antérieures.

Les stocks de poudre de lait écrémé et de beurre de la Communauté européenne comprennent les stocks publics d'intervention et les stocks privés. Les stocks de fromages comprennent les stocks d'intervention (stocks publics en ce qui concerne le Grano-Padano et le Parmigiano Reggiano) et les stocks remplissant les conditions requises pour bénéficier d'une aide au stockage privé.

En ce qui concerne la **Finlande**, les chiffres des stocks se rapportent aux stocks de gros pour laiteries.

En ce qui concerne le **Japon**, les chiffres se rapportent aux stocks de poudre de lait entier détenus par les fabricants, alors que pour la poudre de lait écrémé et le beurre, les stocks sont ceux détenus par les fabricants et par la Société pour la promotion de l'élevage. Les chiffres de production de fromages affinés incluent la production à partir de fromages non-affinés importés.

En ce qui concerne la **Nouvelle-Zélande**, tous les chiffres des stocks comprennent les stocks exportables et les stocks des marchés locaux. Les stocks publics sont nuls. Les statistiques de la poudre de lait écrémé comprennent la poudre de lait partiellement écrémé et la crème en poudre. Les statistiques de la poudre de lait entier comprennent les aliments pour nourrissons.

En ce qui concerne la **Norvège**, les chiffres relatifs au fromage comprennent le fromage de lactosérum (petit-lait) et le fromage affiné.

Dans le cas de la **Pologne**, les chiffres relatifs au fromage ne comprennent que les fromages en maturation et les fromages affinés.

Pour la **Suède**, les chiffres de la production de beurre ne comprennent pas le "Bregott".

Dans le cas de la **Suisse**, les exportations de lait en poudre destinées à l'aide alimentaire sont comprises dans les totaux annuels, mais non dans les chiffres trimestriels. Les chiffres relatifs au beurre comprennent le beurre resolidifié. Les fromages affinés ne sont pas compris dans les statistiques. Les stocks de fromage comprennent l'Emmental, le Gruyère, le Sbrinz, le Tilsit et l'Appenzell.

En ce qui concerne l'**Autriche**, les stocks ne comprennent que les produits d'origine nationale. Les chiffres pour la poudre de lait écrémé comprennent aussi la poudre de babeurre. Les chiffres relatifs à la consommation de fromage ne prennent en compte que les produits nationaux.

Pour le **Canada**, les chiffres relatifs au beurre concernent uniquement le beurre de crèmerie; le beurre de lactosérum (petit-lait) n'est pas inclus. Les chiffres relatifs au fromage comprennent le Cheddar et autres fromages de lait entier.

En ce qui concerne les **Etats-Unis**, les chiffres relatifs aux stocks de poudre de lait se rapportent aux stocks de la CCC. Les exportations de poudre de lait entier comprennent le lait partiellement écrémé, le lait entier sec et la crème.

IDA TOTAL, calculé pour la période 1991-94, se rapporte uniquement aux statistiques fournies par les participants au précédent Arrangement international relatif au secteur laitier, en vigueur jusqu'à fin 1994.

Además, la Secretaría ha utilizado información complementaria procedente de diversas fuentes nacionales e internacionales; en particular, documentación de la FAO, la Comisión Económica de las Naciones Unidas para Europa, la OCDE, la Federación Internacional de Lechería, la Comisión de las Comunidades Europeas, Agriculture-Canada y el Departamento de Agricultura de los Estados Unidos.

Notas relativas a los datos de distintos países

Las cantidades indicadas en concepto de consumo se refieren al consumo aparente, calculado por la Secretaría.

Algunos países no figuran en todos los cuadros, ya sea porque la cuantía de su comercio ha sido insignificante, o porque faltan las cifras.

Las cifras de la leche desnatada en polvo correspondientes a **Australia** incluyen también leche en polvo parcialmente desnatada, nata en polvo, mezclas de leche desnatada en polvo, suero de mantequilla en polvo, y leche desnatada en polvo modificada. Las existencias son las mantenidas por los fabricantes. Las cifras de las existencias de queso abarcan solamente Cheddar, Gouda y cuajada agitada/quesos granulares.

En el caso de **Bulgaria**, se incluye el Kashkaval en las cifras del queso.

Desde 1991, los datos de la **Comunidad Europea** incluyen los de la antigua República Democrática Alemana y Portugal, y llevan la referencia EC12. A partir de 1995, los datos de la Comunidad relativos a producción, incluyen los de Austria, Finlandia y Suecia, y llevan la referencia EC en los cuadros correspondientes. Debido a las modificaciones introducidas en 1992 en las estadísticas italianas sobre productos lácteos, las comparaciones directas con años anteriores no son exactas.

Las existencias de la **Comunidad Europea** de leche desnatada en polvo y mantequilla comprenden las existencias de intervención del sector público y las existencias del sector privado. Las existencias de queso incluyen las existencias de intervención (existencias públicas de Grana-Padano y Parmigiano Reggiano) y existencias acreedoras a la ayuda para el almacenamiento privado.

Las cifras de las existencias de **Finlandia** se refieren a las existencias al por mayor de las centrales lecheras.

Con respecto al **Japón**, las cifras se refieren a las existencias de leche entera en polvo en manos de los fabricantes, mientras que en el caso de la leche desnatada en polvo y la mantequilla, los datos corresponden no sólo a las existencias mantenidas por los fabricantes sino también a las de la LIPC (Corporación de Fomento de la Industria Pecuaria). Las cifras de la producción de quesos fundidos incluyen los quesos fabricados a partir de queso importado.

En todas las cifras de las existencias de **Nueva Zelandia** figuran las existencias para la exportación y las destinadas al mercado interno. Las existencias oficiales son nulas. En las estadísticas de la leche desnatada en polvo figuran también la leche parcialmente desnatada y la crema en polvo. Las estadísticas de la leche entera en polvo incluyen los alimentos para lactantes.

Las cifras de **Noruega** referentes al queso incluyen el queso de suero y el queso fundido.

En el caso de **Polonia**, las cifras del queso comprenden únicamente los quesos de maduración y fundidos.

Las cifras de la producción de mantequilla de **Suecia** no incluyen "Bregott".

Las cifras anuales de exportaciones de leche en polvo correspondientes a **Suiza** comprenden las operaciones de ayuda alimentaria, pero estas exportaciones no se incluyen en las cifras trimestrales. Las cifras de mantequilla incluyen la mantequilla resolidificada. Las cifras de las existencias de queso comprenden Emmental, Gruyère, Sbrinz, Tilsit y Appenzell.

Las existencias de **Austria** incluyen únicamente productos de origen nacional. En las cifras de la leche desnatada en polvo se incluye también el suero de mantequilla en polvo. Las cifras correspondientes de consumo de queso abarcan sólo las ventas de productos nacionales.

En las cifras de **Canadá**, las relativas a la mantequilla corresponden únicamente a la mantequilla de mantequería; no se incluye la mantequilla de suero. Las cifras de los quesos abarcan el Cheddar y otros quesos de leche entera.

Los datos de los **Estados Unidos** sobre las existencias de leche en polvo corresponden a las existencias de la CCC. Las exportaciones de leche entera en polvo incluyen también las de leche parcialmente desnatada en polvo y las de nata en polvo.

IDA TOTAL, calculado para el periodo 1991-94, incluye únicamente las estadísticas facilitadas por los participantes al previo Acuerdo Internacional Sobre Productos Lácteos, en funcionamiento hasta 1994.
